

At Citrofrut we firmly believe that our present and future success depends on developing an environmentally sustainable business. Our responsibility is focused on ensuring the manufacture and distribution of our products while respecting our environment. This responsibility is part of our organizational culture, which allows us to have resources, as well as to make all our collaborators participate.

Citrofrut plants are committed to directing their operations to protect and conserve the environment, focusing on reducing our environmental footprint. Our efforts to take care of the environment are focused on:

- Manage in accordance with applicable legal requirements.
- Develop and continuously improve the environmental management model to comply with the required certifications and improve environmental performance through clear objectives and goals.
- Encourage with our collaborators respect for the environment both inside and outside the company.
- Promote the use of recycled packaging materials.
- Promote the management of water as a natural resource in our operations.
- Bet on renewable energy, reducing dependence on fossil fuels in our operations.
- Facilitate the reduction of carbon, water, and waste footprints in our operations.
- Create with our main waste a valuable resource for society, betting on circular economy projects.
- It will ensure the protection of ecosystems and biodiversity in the areas where our plants are found, as well as guarantee that our operations respect the right of the communities that surround us to a healthy environment.
- Maintain an open and transparent culture on environmental issues, with the community, government agencies, clients, and value the expected objective mainly from clients and suppliers.

At **Citrofrut** we have a great mission: to contribute to improving the nutrition of the world by offering fruit products in a sustainable way, generating social, environmental, and economic value, based on a solid humanistic culture.
